

## JUVENILE DETENTION

***S**ince 1991, the number  
of juveniles held in  
detention has increased by  
79 percent.*

Washington has 20 county-operated detention facilities, which are maintained by the juvenile courts, and one regional center maintained by a consortium of counties. Juveniles from all 39 counties are held in these 21 facilities.

Juveniles are held in local detention facilities to await court hearings or as sentenced offenders. Some facilities also hold juveniles sentenced to the State Juvenile Rehabilitation Administration.

Juvenile detention population figures used in this report were provided by the Office of the Administrator for the Courts. Population figures represent each entry into the detention database (episode), where a juvenile was held for four hours or longer. Juveniles who are over the age of 18 and who are under the jurisdiction of the juvenile court or who have been remanded to adult court are also included in the detention population data. A juvenile may be held in detention more than once within a year depending on the number of times the juvenile offends. Changes in the method of tabulation may account for differences in population data from previous years.

The number of juveniles held in detention facilities in 2002 decreased by five percent from 1998. From 1992 to 1998 the number of juveniles held in detention facilities increased steadily by 79 percent (from 19,303 to 34,667).

There were 32,800 juveniles held in detention on separate offenses during 2002. This figure represents a rate of 53.7 per thousand juveniles age 10-17, an increase from the 2001 rate of 46.9.

Facilities that experienced an increase from 2001 to 2002 of over ten percent in the number of juveniles held in detention include: Chelan (16.3%), and Medical Lake (14.7%), Spokane (15%). Facilities experiencing a decrease of over ten percent include: Clallam (13.2%), and Yakima (14.3%).

. . . . .

## RACE AND ETHNIC DISTRIBUTION

Reporting of race and ethnicity has increased since 1986. Consequently, the rate of increase in detention population may be overstated. Minority youth, age 10-17, representation in detention has shown a steady decrease from 38 percent in 1996 to 27.4 percent in 2002.

The race and ethnic distribution of the detention population during 2002 showed that 65 percent were White, 11 percent were Black, five percent were Native American, three percent were Asian/Pacific Islander, and eleven percent were Hispanic. Race or ethnicity was not reported for four percent of the detention population.

## JUVENILE DETENTION (continued)

These figures show the following percent changes since 1996: three percent increase in the White population, four percent decrease in the Black population, one percent increase in the Native American, Asian, and Hispanic populations and one percent decrease in the not reported category.

. . . . .

### **GENDER**

Females held in detention facilities during 2002 represent 27.7 percent of the detention population. The percent of females held in detention facilities has steadily increased by 57 percent since 1992 (17.6% in 1992 to 27.7% in 2002).

## JUVENILE ADMISSIONS TO DETENTION FACILITIES

January 1 through December 31, 1988 - 2002

Sources: Office of the Administrator for the Courts & county detention data sources for Grays Harbor, King, Kitsap, Mason, and Medical Lake.

## JUVENILE POPULATION IN THE JUVENILE REHABILITATION ADMINISTRATION (JRA)

*The JRA residential and institution population decreased over the last four years.*

The county juvenile courts commit the most serious offenders to JRA. With rare exception, youth committed to JRA have been adjudicated for at least one violent offense, or a large number of various offenses.

JRA operates the following five secure residential facilities:

- Three maximum security institutions (Green Hill School, Maple Lane School, and Echo Glen Children's Center).
- One medium security youth camp (Naselle).
- One basic training camp (Camp Outlook) which is operated through a contract with Second Chance, a private non-profit corporation.

Both Echo Glen and Naselle provide services for female offenders.

Additionally, JRA operates seven state run community facilities with 103 minimum-security beds and contracts for 52 community facility beds with private providers.

Juveniles released from these facilities may be supervised in the community for up to 6 months; most sex offenders are supervised for 24 to 36 months.

JRA provides specialized drug and alcohol treatment services to chemically addicted juvenile offenders (82% of the youth committed to JRA are substance abusers or are chemically dependent).<sup>1</sup> JRA currently operates three separate intensive inpatient chemical dependency programs, two intensive outpatient programs and one recovery house and long-term care chemical dependency program. Other institutional and community programs include: drug and alcohol assessment, intervention, education, and aftercare. Sex offenders are provided assessments, treatment and resources throughout the JRA system. Offenders with mental health disorders are given assessments, appropriate medication management and treatment services.

Currently more than 60 percent of youth in JRA residential care meet criteria for inclusion in JRA's Mental Health Target Population (MHTP). This is JRA's most steadily growing population and has risen from 40 percent of JRA's residential population in 2000 to the present day level of more than 60 percent. Criteria for inclusion in the MHTP are as follows:

- A current DSM-IV Axis 1 diagnosis, excluding those youth who have a sole diagnosis of Conduct Disorder, Oppositional Defiant Disorder, Pedophilia, Paraphilia, or Chemical Dependency; **OR**
- Is currently prescribed psychotropic medication; **OR**
- Has demonstrated suicidal behavior within the last six months.

---

<sup>1</sup> <http://www1.dshs.wa.gov/jra/Offserve.htm>

**JUVENILE  
REHABILITATION  
ADMINISTRATION  
(continued)**

Over 90 percent of youth in JRA's MHTP have one, two, or three co-occurring disorders including, chemical dependency, cognitive impairment, sexual misconduct, and medical fragility.

Populations for both the residential programs and institutions showed a decrease over the last five years (1998 to 2002). (From 1990 to 1997, the populations in institutions steadily increased.)

The average daily population in all residential programs for 2003 was 945, a decrease of 21 percent from the 2002 average daily population of 1,192. From 1997 (when the average daily population peaked at 1,394) to 2003 the average daily population has decreased by approximately 32 percent.

The average daily population of juveniles in JRA institutions for 2003 was 781, a decrease of 13 percent from the 2002 figure of 893. From 1997 (when the average daily population peaked at 1,038) to 2003 the average daily population has decreased by approximately 25 percent.

The average daily population for community placement for 2003 was 164. This figure is a decrease of six percent from the 2002 figure of 175. From 1997 to 2003, the average daily population for community placement has decreased by 56 percent. (This decrease can be attributed to a change in JRA policy.)

The average daily active parole caseload for the 2003 was 823, a decrease of over 10 percent from the 2002 figure of 920.

.....

**RACE AND ETHNIC  
DISTRIBUTION**

A one-day survey of JRA population on June 30, 2003, of the racial/ethnic distribution within JRA for that day, showed that: 54 percent were White, 17 percent were Black, seven percent were Native American, 12 percent were Hispanic, four percent were Asian, and six percent "other."

The percentage of Non-Hispanic White juveniles held in JRA facilities decreased by seven percent between 1993 and 2003. The percentage of Black youth decreased by 23 percent, the percentage of Native American youth increased by 28 percent (from 5 percent to 7 percent), the percentage of Hispanic youth increased by eight percent (from 11 percent to 12 percent), and the percentage of Asian youth remained the same. The number of reported "Other" juveniles increased from one percent in 1993 to six percent in 2003.

The percentage of non-white youth held in state juvenile correctional institutions for 2002 was 43.3 percent. In 2002, Black youth were confined in state juvenile correctional institutions more than four times their proportion of the general population (Black youth represented less than four percent of the juvenile population and 18 percent of the population in JRA in 2002).

**JUVENILE  
REHABILITATION  
ADMINISTRATION  
(continued)**

**GENDER**

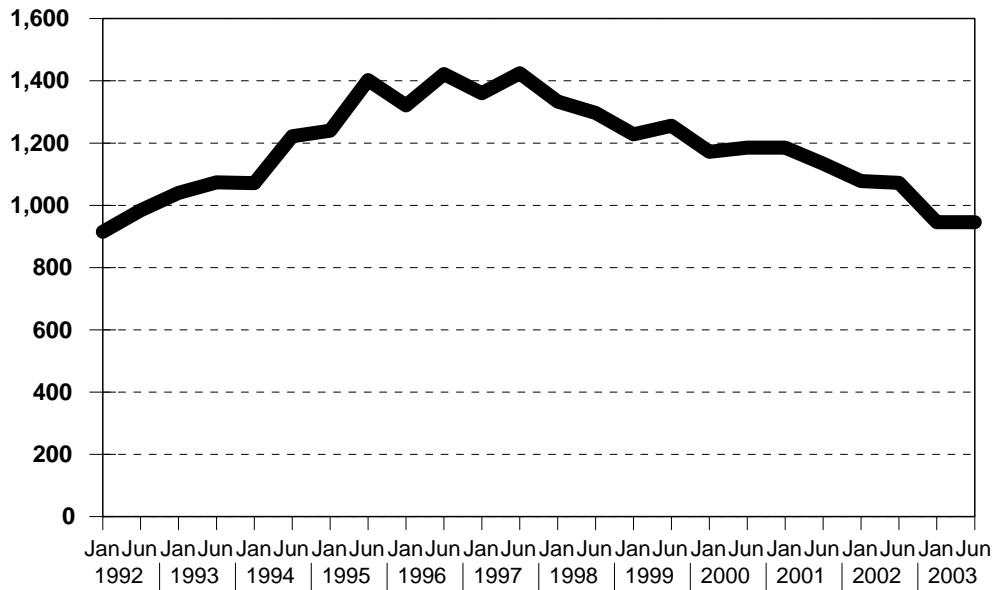

Characteristics of the JRA population for the first eight months of 2003 showed that 45.5 percent were non-white, 7.6 percent were female, 18.5 percent were sex offenders, and 41.6 percent were violent offenders.

.....

The percentage of females in JRA for the first nine months of 2003 (7.6 percent) is a decrease of five percent from the 2002 rate of 8.0 percent, and an 18 percent decrease from the peak rate of 9.2 percent in 1999.

## CONSOLIDATED JUVENILE SERVICES

The CJS program, initiated in 1981, is a partnership between the state, county juvenile courts and the private sector, in which each shares in the cost of providing local comprehensive services to youthful offenders. These pre-commitment services include: diversion, probation supervision, individual and family counseling, drug/alcohol assessment and treatment, vocational training, and psychiatric and psychological services. There are CJS programs for at-risk youth in all 33 juvenile court jurisdictions representing the 39 counties.

The CJS funding allocations for FY 2003-2005, for CJS at-risk youth, is approximately twelve and a half million dollars. The funding formula used for determining at risk youth funding is: 50 percent for the 10 to 17 year old population, 10 percent for birth through 17 year old minority population, 10 percent for TANF recipients, 10 percent for criminal filings, 10 percent for diversion referrals, and 10 percent for high school dropouts

### **CJS At Risk**

Counties applying for CJS funds for the 2003-2005 biennium must include efforts to address minority disproportionality in their plans. Any county applying for CJS funding that also operates a detention facility must have standards of operation in place. These include intake and admissions, medical and health care, communication, correspondence, visiting and telephone use, security and control, sanitation and hygiene, juvenile rights, rules and discipline, property, juvenile records, safety and emergency procedures, programming, release and transfer, training and staff development, and food service.

### **SSODA** (*Special Sex Offender Disposition Alternative*)

In addition to these pre-commitment and prevention services, the state also funds two alternatives to standard commitment to juvenile rehabilitation facilities. The first, the Special Sex Offender Disposition Alternative (SSODA), for first time sex offenders, allows the court to suspend the disposition of the offender and require the youth to receive treatment in the community. The total SSODA allocation for FY 2003-2005 is approximately \$5.4 million

### **CDDA** (*Chemical Dependency Disposition Alternative*)

The second alternative, legislated in 1997, created the Chemical Dependency Disposition Alternative (CDDA), as an alternative to standard commitment for juvenile offenders who are chemically dependent, with a standard range of local sanctions of 15 – 36 weeks and who haven't committed an A- or B+ offense. The sum of the confinement and outpatient treatment may not exceed 90 days. The CDDA funding allocation for FY 2003-2005 is approximately \$4.7 million.

CONSOLIDATED  
JUVENILE  
SERVICES  
(continued)

**CJAA** (*Community Juvenile Accountability Act*)

Also, the 1997 Legislature passed the Community Juvenile Accountability Act (CJAA), a program to enable local courts to develop and administer community-based accountability and intervention programs, focusing on interventions shown to be effective in reducing recidivism among juvenile offenders. Functional Family Therapy, Aggression Replacement Training, Multi-Systemic Therapy, and Coordination of Services are the four CJAA interventions. The CJAA funding allocation for FY 2003-2005 is approximately 6.2 million dollars.

These funds, administered by the state, and allocated to counties, are combined into a single Consolidated Juvenile Services contract. This enables the counties to blend some of the funds into service packages that better meet the needs of youth and families.

Each county's share of CJS funding for FY 2003-2004 is shown in the following tables.

. . . . .
